One Concern — Catastrophe Modeling Vendor Profile

Published November 21, 2026 · Risk Coverage Hub (riskcoveragehub.com) · Informational reference only; zero vendor rankings.

Direct answer: One Concern, Inc. is an independent California-based resilience and catastrophe-analytics company (listing 548 Market Street, San Francisco on its live contact page, with Menlo Park origins). Its digital-twin platform quantifies how floods, earthquakes, and storms trigger power outages, infrastructure failures, and business-interruption downtime.

What One Concern Models and Sells

One Concern combines hazard science with machine-learning dependency graphs (known for Domino AI / DNA resilience scoring) to model 'outside-the-fence' indirect catastrophe risk—measuring downtime in days or hours across power grids, transport links, and supply chains rather than direct structural damage alone. It deploys via enterprise software and strategic insurer partnerships (including Swiss Re, Sompo, and WTW).

Attribute	Primary-Source Verified Record
Candidate # / Gate	#38 — PUBLISH (Option B)
Ownership	Independent privately held resilience software company (One Concern, Inc.; Menlo Park roots, San Francisco HQ address on live contact page).
Headquarters	San Francisco, CA
Named Platforms	One Concern Digital Twin & Resilience Analytics Platform (Domino AI / DNA downtime and outside-the-fence risk metrics)
